Profile

I am a full time developer based in Reston VA that specializes in responsive, dynamic, and highly interactive front-end web experiences. For over five years, I have helped startups in the DC area rapidly launch and maintain their initial web presences. In addition to web based development services, I have extensive experience with analytics, SEO, A/B testing, and digital marketing.

Experience

SENIOR FRONT-END DEVELOPER, EXTENSIA; STERLING, VA; FEB 2017 - PRESENT

Typscript, Fabric.js, Angular, Bootstrap, Kendo, Webpack, Java, Tapestry

As the lead of the web-development portion of our project, I have been able to develop Extensia's web product from concept to initial launch in under a year. I designed and built a canvas-based WYSIWYG designer that allows customers to design ID card templates in the browser. I also built a dashboard web application for managing card templates and card printers.

LEAD UX/UI DEVELOPER, CURIOSITYSTREAM; SILVER SPRING, MD; OCT 2014 - FEB 2017

Angular, React, Redux, Bootstrap, SASS, Wordpress, PHP, Laravel

As sole Front-End developer I developed and launched a marketing site, video on demand streaming application, and media CMS dashboard within 6 months. I worked with our digital marketing firm to optimize our marketing funnel by setting up analytics, tag management, SEO, and A/B testing.

SENIOR FRONT-END DEVELOPER, STORYBLOCKS; RESTON, VA; MAY 2014 - OCT - 2014

HTML, CSS, Javascript, jQuery, PHP, Node

I worked on improving and re-designing the front-end for three large web applications. Additionally, I worked with the marketing team to design and code mobile landing pages, build and optimize email campaigns, setup A/B tests, and create channel specific landing pages for social-media and SEM.

FRONT-END DEVELOPER, HODGSON CONSULTING; KENSINGTON, MD; SEP 2013 - MAY 2014

HTML, CSS, Javascript, jQuery, .NET, Ektron, Wordpress

I built out and integrated responsive front-ends for CMS based web sites and web applications. Many customers were colleges and non-profits who were focused on accessibility and responsiveness.

Contracts

Front-End Developer, Pipevine; McLean, VA; Apr 2014 - July 2014
Front-End and Rails Developer, Synapsify; Bethesda, MD; Nov 2013 - Apr 2014
Web Application Developer, Innolance; Sterling, VA; Feb 2013 - Sep 2013

Hackathons

Twitters 2nd Place prize at HackMIT for PartyGenius; Cambridge, MA; Nov 2013
Y-Hack; New Haven, CT; Nov 2013
